The shortage of non-ferrous metals is responsible for the introduction of more and more restrictions. State enterprises, as well as private firms, must first turn in old, used batteries to shops of the Central Administration of Scrap metal before buying new ones. The turned in batteries must be equal in metal weight to 90% of the metal weight of whatever number of new ones are desired; then permission to sell the new batteries is granted to the supplying firm. In cases where the buyer cannot supply the required percentage of scrap metal the price of the new battery goes up by two-thirds.
